

# Subscription Services For Splunk

## FLEXIBLE EXPERT SUPPORT FOR SPLUNK

In a world where data never sleeps, **Splunk** is the engine driving your digital resilience. But the reality is: your data needs today won't be your needs tomorrow. Traditional project-based engagements are often too static for a platform as powerful and expansive as Splunk. You need a partnership that scales and pivots alongside you. Because your Splunk journey is dynamic, your support deserves to be just as flexible.

## THE SUBSCRIPTION SERVICES SOLUTION

Your team will gain **on-demand access to expert professional services consultants** specializing in **Splunk best practices and success**. Instead of lengthy project scopes and rigid timelines, this service allows you to leverage Splunk expertise precisely when and how you need them.

Built for agility, this ensures you can quickly and easily augment your team with the right Splunk skills to accomplish specific tasks and achieve your desired outcomes, even as your needs evolve.

## KEY BENEFITS

- **Unmatched Agility:**  
Pivot quickly without the delays and complexities of re-scoping.
- **Predictable Costs:**  
This credit-based system means lower upfront cost commitments and clear visibility into your service consumption.
- **Barrier-Free Expertise:**  
Say goodbye to the typical administrative and contractual barriers associated with project-based engagements.
- **Optimized Resource Allocation:**  
Augment your internal team strategically, filling skill gaps precisely when and where they're needed.
- **Outcome-Oriented Support:**  
Achieve specific, desired outcomes for each Splunk task, ensuring clear value delivery.

## HOW IT WORKS: AGILE & CREDIT-BASED

This service operates on a **credit-based subscription model**, for a modern, efficient alternative to conventional professional services engagements.

### **Task-Based Service Catalogue:**

Gain access to a comprehensive Service Catalogue, outlining specific Splunk-related tasks and outcomes delivered by our experts (e.g. search troubleshooting, health checks, etc.). Allowing for clear scope and predictable delivery for each engagement.

### **On-Demand Access**

When a new Splunk requirement emerges or an unexpected challenge arises, simply select the needed task from the catalogue, and our experts will engage to help you achieve your desired outcome.

### **Flexible Credit Usage**

Your subscription provides a pool of credits, which are consumed based on the tasks you utilize. This model eliminates the need for large, upfront project commitments.

## WHO IS THIS FOR?

This service is ideal for **teams that prioritize flexibility, efficiency, and continuous improvement in their Splunk initiatives**. If your Splunk projects often face evolving scopes, require intermittent expert support, or benefit from agile resource augmentation, our Subscription Services are designed for you.
